## Statement concerning REACH Regulations

Dear valued customer,

the regulation (EC) No. 1907/2006 about the registration, evaluation and authorization of chemicals (REACH) and their restriction of use came into force June 1, 2007.

The ECHA organisation monitoring the REACH regulations publishes periodically so-called candidate lists of substances of very high concern (SVHC).

We have reviewed our supply chain and can confirm that all materials used for our products and packaging are below the limit values of 0.1 mass percent or contain none of the substances of the candidate list (SVHC).

Please keep in mind that article 33 of the REACH regulation stipulates a duty to inform only when the limit value of 0.1 mass percent is exceeded. As SVHC candidate lists are revised several times a year, this clause avoids unnecessary documentation.

Our suppliers are committed to the application of the REACH regulation. Even though the candidate list might be revised in the future, you can expect our products to conform to REACH as long as you do not receive a message from us.

We will inform you promptly according to REACH regulations.

Best regards

Mr. Peter Schneider  
Lead of Quality Assurance
